

UN SDG 11: Sustainable Cities & Communities

UN SDG 16: Peace, Justice & Strong Institutions

"Report. Resolve. Improve Your City."

CivicFix transforms urban grievance management from an opaque bureaucratic backlog into an autonomous, transparent, data-driven civic contract. Citizens report problems in plain language; CivicFix AI categorizes, prioritizes, detects duplicates, routes tickets, and plots spatial hotspots.

01. THE PROBLEM VS. THE CIVICFIX SOLUTION**Traditional Municipal System**

- Confusing departments & rigid category menus
- Duplicate tickets overwhelm work crews
- Opaque "black hole" status damages trust
- Slow weeks-long turnaround with zero tracking

CivicFix Autonomous AI Redressal

- + Zero-Bureaucracy Intake: Plain language AI triage
- + Multi-factor duplicate detection & petitioning
- + Immutable 5-stage timeline with officer audit
- + OpenStreetMap hotspot rings for prompt dispatch

02. AUTONOMOUS GRIEVANCE RESOLUTION WORKFLOW

Timestamped Finish

03. CORE TECHNICAL INNOVATIONS**Hybrid AI Triage Engine**

Combines Google Gemini API with a local rule-based heuristic classifier. Extracts category, severity, keywords, and priority in under 1 second. Guarantees zero demo crashes.

Multi-Factor Duplicate Engine

Combines Haversine geographic distance (<600m) with category matching and Jaccard keyword overlap to alert citizens and aggregate related neighborhood issues.

OpenStreetMap Spatial GIS

Zero Google Maps API keys required. Powered by Leaflet.js with category-coded SVG markers, popup detail cards, and glowing red density hotspot circles.

04. CivicFix â UN SDG Alignment & Quantitative Analytics

Detailed Target Verification & Architectural Metrics

05. UN SDG 11: SUSTAINABLE CITIES & COMMUNITIES

Target 11.2 â Safe Road Systems & Transit:

AI triage flags deep craters, damaged pavement, and broken traffic signals with HIGH priority to mitigate two-wheeler skids and pedestrian accidents before they result in casualties.

Target 11.6 â Environmental Health & Waste Reduction:

Sanitation garbage overflow and sewage clogs are geocoded to detect repeated dumping patterns, prevent contamination of water lines, and optimize municipal waste collection routes.

Target 11.7 â Safe, Inclusive & Accessible Public Corridors:

Immediate escalation of non-functional streetlights around colleges and residential paths to enhance safety.

06. UN SDG 16: PEACE, JUSTICE & STRONG INSTITUTIONS

Target 16.6 â Effective, Accountable & Transparent Institutions:

Every status modification is immutably logged with the officer name, timestamp, and action notes in status_history. Completely eliminates bureaucratic discretion and silent ticket drops.

Target 16.7 â Responsive & Participatory Co-Governance:

Duplicate intelligence links related complaints together, elevating individual grievances into prioritized neighborhood petitions without creating administrative clutter.

Target 16.10 â Public Access to Information & Civic Data:

Open analytics and OpenStreetMap hotspot clusters allow citizens and media to audit resolution velocity.

07. REAL-WORLD PLATFORM BENCHMARKS & METRICS

08. PRODUCTION-GRADE DATABASE & SECURITY ARCHITECTURE

Relational MySQL 8.0+ Tables:

```
â ¢ users (id, name, email, password_hash, role, department, created_at)
â ¢ complaints (id, complaint_code, user_id, description, summary, category, priority, department, status, lat, lng, address)
â ¢ complaint_keywords (id, complaint_id, keyword) with indexed search
â ¢ complaint_duplicates (id, complaint_id, duplicate_complaint_id, similarity_score)
â ¢ status_history (id, complaint_id, old_status, new_status, changed_by, notes, changed_at)
```

Security: bcrypt password hashing (10 salt rounds), JWT Bearer authentication, and Role-Based Access Control.

09. ROADMAP & EXPANSION

1. Vernacular Voice Input: Multilingual speech-to-text for inclusive citizen reporting.
2. WhatsApp / SMS Integration: Instant grievance filing via phone cameras and location pins.
3. Computer Vision Verification: Automated before-and-after photo inspection before closing work tickets.
